DEPOSITORY LIBRARY MATERIAL

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Corporations and Labour Unions Returns Act
(CALURA) Sub-division,
Business Finance Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-9804) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnement et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Sous-division des déclarations des corporations et des syndicats ouvriers (CALURA),
Division des finances des entreprises,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-9804) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)

Introduction

As amalgamations, acquisitions and mergers of significance continue to occur both in Canada and abroad the ownership of the Canadian economy continually changes. These changes may affect the concentration of corporate power, the degree of foreign control and the structure of corporate industrial society. In response to these developments there have been numerous ownership information requests from a broad spectrum of Canadian society.

To meet this information need, this latest *Inter-corporate Ownership* publication has been prepared. It is a reliable index of who owns and/or controls whom in Canada. It is intended to serve as an essential reference tool for corporate executives, bankers, financiers, marketing managers, investors, researchers and the general public, all of whom desire the latest detailed information on the corporate structure of Canadian society.

Though the ownership information contained in this directory is principally a preliminary 1978 version, all major takeovers and changes effective as of July 1, 1979 have been included. This information is based primarily upon non-confidential returns filed by Canadian corporations under the Corporations and Labour Unions Returns Act (CALURA). However other public sources, such as the Foreign Investment Review Agency newsletter, the merger register at Consumer and Corporate Affairs, and numerous business publications have been used to supplement CALURA returns for 1978 and the first half of 1979.

In addition, using such international publications as *Moody's*, *Jane's* and *Who Owns Whom*, information on ultimate foreign parent corporations has been obtained. In many cases, researchers have combined apparently unrelated enterprises operating from a number of foreign countries into one multinational enterprise. Wherever possible, researchers have searched and carefully examined the existence of any options, insider holdings, convertible shares and interlocking directorates, which could affect the control of a corporation. In a number of cases, reported nominees have been replaced by true owners. Information on certain family controlled corporations is included so that privately owned corporations may appear as an integral part of an enterprise. Much of this research has resulted in expanded enterprise

Introduction

L'économie canadienne change constamment de mains au gré des absorptions, des prises de contrôle et des fusions importantes qui ne cessent de se produire au Canada et à l'étranger. Ces changements peuvent avoir des incidences sur la concentration du pouvoir des corporations, l'importance du contrôle étranger et la structure des sociétés industrielles. Ils ont d'ailleurs suscité quantité de demandes de renseignements sur la propriété des corporations de la part de Canadiens de tous les milieux.

Nous produisons cette nouvelle version de la publication *Liens de parenté entre corporations* pour répondre à ces demandes. Il s'agit d'un index fiable indiquant qui possède et (ou) contrôle qui au Canada. Son but est de servir d'ouvrage essentiel de référence aux directeurs de sociétés, aux banquiers, aux financiers, aux responsables de la mise en marché, aux investisseurs, aux chercheurs et au grand public, qui désirent tous des renseignements détaillés sur la structure des corporations au Canada.

Bien que le présent répertoire se fonde essentiellement sur des renseignements provisoires valables pour 1978, les mainmises et tout autre changement majeur en vigueur le 1^{er} juillet 1979 ont été consignés. Les renseignements sont tirés surtout des déclarations non confidentielles faites par les corporations canadiennes en vertu de la Loi sur les déclarations des corporations et des syndicats ouvriers (CALURA) et portant sur l'année 1978 et la première moitié de 1979. On a également eu recours à d'autres sources publiques, notamment le bulletin de l'Agence d'examen de l'investissement étranger, le registre des fusions de Consommation et Corporations Canada et diverses autres publications commerciales.

En outre, des publications internationales telles *Moody's*, *Jane's* et *Who Owns Whom* ont servi à déterminer les corporations étrangères qui étaient des propriétaires ultimes. Dans bien des cas, les chercheurs ont combiné en une entreprise multinationale des entreprises sans lien de parenté apparent et établies dans divers pays étrangers. Chaque fois qu'ils le pouvaient, ils ont fait des recherches poussées afin de repérer les options, les parts des dirigeants, les actions convertibles et les conseils d'administration liés qui influeraient sur le contrôle d'une corporation. En maintes occasions, ils ont remplacé les propriétaires pour compte par les propriétaires véritables. Les renseignements sur certaines sociétés familiales sont également inclus de telle sorte que les corporations appartenant à des particuliers puissent figurer comme faisant partie intégrante d'une même entreprise. Cette recherche a fait ressortir des structures plus

structures, spanning several countries and leading to new insights into the organization of multinational enterprises operating in Canada.

Ownership

To provide a meaningful and concise framework for examining inter-corporate ownership, relationships between corporations have been classified and presented according to their importance. The relationship presented is that involving the ownership or holding of the voting rights of a corporation by another corporate body or group of related individuals. The principal feature of this publication is that ownership relationships between corporations under common control are shown together. This forms what is termed the "enterprise".

Naturally, there are also numerous non-control relationships for a set of related corporations. All ultimate owners and joint equally owned corporations have been identified and each of these is designated as the head of a "complex". The complex represents all the control and non-control ownership relationships starting with an ultimate owner or a joint equally owned corporation.

Finally, the remaining concept is the "group". A group is an exhaustive collection of related corporations. It contains all the complexes that are in any way related. Note that the largest group in this publication contains well over 10,000 corporations, whereas there are thousands of groups of only two or three corporations. Please note that the word "group" has another connotation as well. In the case of common control by related individuals, it may appear in the name of the controlling interest (e.g., Jodrey Group, Bata Group, Irving Group). This latter usage is similar to that employed by the business community.

Other Information

Each enterprise is classified to a country of control which applies to the parent corporation (enterprise head) and its subsidiaries. The inter-corporate ownership index identifies all foreign-controlled corporations in Canada, even those without inter-corporate ownership. Each active Canadian resident corporation has been given a Standard Industrial Classification (SIC) and a province of residence. This presents a picture of enterprise activity in terms of horizontal and vertical integration, conglomeration, multinational participation and provincial location of the corporation's head office.

Special Note

Computerized methods have been used in the development of this directory to ensure consistency and reliability. Nevertheless, it is possible that infor-

vastes, s'étendant dans divers pays, et a projeté de nouveaux éclairages sur l'organisation des multinationales en activité au Canada.

Propriété

Pour une présentation utile et concise des liens de parenté entre corporations, nous les avons classés par ordre d'importance. Le lien mentionné concerne la possession des droits de vote d'une corporation par une autre ou par un groupe de personnes apparentées. La caractéristique principale de la publication est que les corporations sous contrôle commun sont présentées ensemble. Nous désignons un tel groupe comme une "entreprise".

Naturellement, il existe également à l'intérieur d'un ensemble de corporations de nombreux liens ne comportant aucun contrôle. Les propriétaires ultimes et les corporations en propriété à part égale ont tous été mis en évidence et dénommés tête d'un "complexe". Le complexe représente tous les liens de parenté, impliquant ou non un contrôle, à partir d'un propriétaire ultime ou d'une corporation en propriété à part égale.

La présente publication utilise le "groupe" comme unité finale. Il rassemble toutes les corporations ayant des liens de parenté entre elles et renferme tous les complexes liés d'une manière quelconque. Le lecteur constatera que le plus gros groupe mentionné ici compte plus de 10,000 corporations, alors qu'il en existe des milliers qui n'en réunissent que deux ou trois. On notera que le terme "groupe" n'a pas toujours ce sens. Lorsque des personnes apparentées exercent un contrôle commun, le mot groupe peut désigner les intérêts majoritaires (ex., Groupe Jodrey, Groupe Bata, Groupe Irving). Cet usage correspond à celui du milieu des affaires.

Autres renseignements

On classe chaque entreprise selon le pays de contrôle de la corporation mère (tête d'entreprise) et de ses filiales. Ce répertoire énumère également toutes les corporations contrôlées de l'extérieur qui font affaire au Canada, y compris celles qui n'ont aucun lien de parenté. On a attribué un code CAÉ (Classification des activités économiques) à chaque corporation canadienne active, ainsi qu'un code représentant la province de résidence. Cela permet de dégager une image des activités de l'entreprise en ce qui concerne l'intégration horizontale et verticale, la présence de conglomerats, la participation multinationale et la province où est établi le siège social de la corporation.

Note spéciale

Nous avons fait appel à l'ordinateur pour la confection de ce répertoire afin d'en assurer l'uniformité et la valeur. Il se peut néanmoins que certains renseignements fournis à

mation supplied to the CALURA Administration under the Act or obtained from international publications and research sources, could be in error. Any inaccuracies brought to the attention of the authors will be corrected in a subsequent edition.

l'Application de CALURA en vertu de la Loi, tirés de publications internationales ou obtenus au cours des recherches soient erronés. Toute inexactitude signalée aux auteurs sera corrigée dans une prochaine édition.

STATISTICAL NOTES

Coverage

Corporations principally covered in this report are those that are required to file a schedule of ownership information under CALURA. Under the Act all corporations with assets greater than \$250,000 or sales greater than \$500,000 are required to file a schedule of ownership information. Corporations not meeting this financial criteria are exempt, although information on them has been included where volunteered or found through research. In addition, other important segments of the corporate universe are exempt because they report under other federal acts or because they are agents of the Government of Canada, a province or a foreign country. Non-profit organizations established for the furtherance of religious or charitable purposes are also exempt.

Research of international financial and ownership publications was undertaken to obtain true beneficial owners rather than nominees wherever possible. In many cases data derived solely from the CALURA returns was insufficient in bringing related corporations in Canada together into one enterprise because corporations are required only to report their first foreign parent. In many cases, these first foreign parents were traced back to an ultimate parent corporation that may be one or two countries removed from the one reported. This has resulted in a more accurate assignment of country of control to the enterprise.

Under the Act, corporations are not required to report the names of individuals owning shares. In a select number of cases, where such information was deemed significant in determining the control of a corporation, data on personal share holdings was integrated with inter-corporate ownership information.

Country of Control

Each corporation that is CALURA size (i.e., assets greater than \$250,000 or sales greater than \$500,000) is assigned a "Country of Control". A corporation is considered to be foreign controlled if 50% or more of its voting rights are held in a foreign country or are held by one or more Canadian corporations that are themselves foreign controlled. In the case of a multi-corporation enterprise, it is the enterprise head or parent corporation that is considered first and each subsidiary within the enterprise is assigned the same country of control as its enterprise parent (see Example 1). If the enterprise head is a Canadian-resident corporation, the country of control is ascribed to that country in which the majority of the voting rights are held by both individuals and corporations. In those cases where the holdings of

NOTES STATISTIQUES

Champ d'observation

Les corporations concernées principalement par le présent rapport sont celles qui doivent présenter des renseignements sur leur appartenance de CALURA, parce que leur actif s'établit à plus de \$250,000 ou que leur chiffre d'affaires dépasse \$500,000. Même si les corporations qui ne répondent pas à ce critère financier ne sont pas tenues de produire ces renseignements, ceux qu'elles fournissent volontairement et ceux obtenus par des recherches ont été incorporés ici. En outre, d'autres segments importants de l'univers des corporations sont exempts de cette obligation parce qu'ils présentent des déclarations en vertu d'autres lois fédérales ou qu'ils sont des agents de l'administration du Canada, d'une province ou d'un pays étranger. Il en va de même des organisations sans but lucratif établies à des fins religieuses ou charitables.

Dans la mesure du possible, on a dépouillé les publications financières et les répertoires de caractère international en vue de trouver les propriétaires véritables. À elles seules, les déclarations CALURA étaient souvent insuffisantes pour le regroupement en une seule entreprise des corporations canadiennes ayant des liens de parenté parce que les corporations sont tenues d'indiquer seulement leur corporation mère immédiate à l'étranger. Dans bien des cas, celle-ci a été reliée à une corporation mère ultime établie dans un premier ou un deuxième pays autre que le pays de contrôle déclaré. Cette recherche a permis de déterminer avec plus d'exactitude le pays de contrôle des entreprises.

Aux termes de la Loi, les corporations ne sont pas tenues de déclarer le nom des particuliers qui détiennent des actions. Nous avons jugé, parfois, que cette information était utile pour déterminer qui a le contrôle de la corporation; nous avons alors intégré des données sur les actions détenues par des particuliers aux renseignements sur les liens de parenté entre corporations.

Le pays de contrôle

On détermine le "pays de contrôle" de chaque corporation répondant aux critères de CALURA (actif de plus de \$250,000 ou chiffre d'affaires supérieur à \$500,000). Une corporation est dite sous contrôle extérieur si 50 % ou plus de ses droits de vote sont détenus par une personne morale ou physique résidant à l'extérieur du Canada ou par une ou plusieurs corporations canadiennes elles-mêmes contrôlées à l'étranger. Dans le cas des entreprises à corporations multiples, on commence par établir le pays de contrôle de la tête d'entreprise ou de la société mère, que l'on attribue ensuite à chaque filiale de l'entreprise (voir exemple 1). Si la tête d'entreprise est une corporation résidant au Canada, le contrôle en est attribué au pays où la majorité des droits de vote sont détenus par des particuliers ou des corporations. Dans les cas où plus de 50 % des droits de vote sont répartis entre des actionnaires indépendants résidant dans plus d'un

over 50% of the voting rights are distributed among non-associated shareholders in two or more foreign countries, foreign-control unspecified is assigned (see Example 5). A parent corporation whose voting rights are owned equally by a Canadian-controlled and a foreign-controlled corporation is given a foreign control code (see Example 3). If two foreign-controlled corporations own the largest and equal amounts of the voting rights of a Canadian corporation, the United States code takes precedence, followed by the United Kingdom and then the remaining countries belonging to the OECD (see Example 4).

Strict adherence to these conventions can lead to a company's reclassification as a result of relatively minor stock transactions when the non-resident ownership of the outstanding voting rights of the company is close to 50%. In order to avoid such swings, corporations are reclassified only when changes in ownership of the voting rights are substantial or appear to alter the potential or effective control over the management of the company.

In most cases of foreign control, the country of control classification is based on tracing ownership links to the first parent corporation which is a resident of a foreign country. However, it is at times possible to determine that the first foreign parent itself, is in fact controlled by another foreign corporation which may reside in a different foreign country. In such instances control is assigned to the country of the ultimate parent.

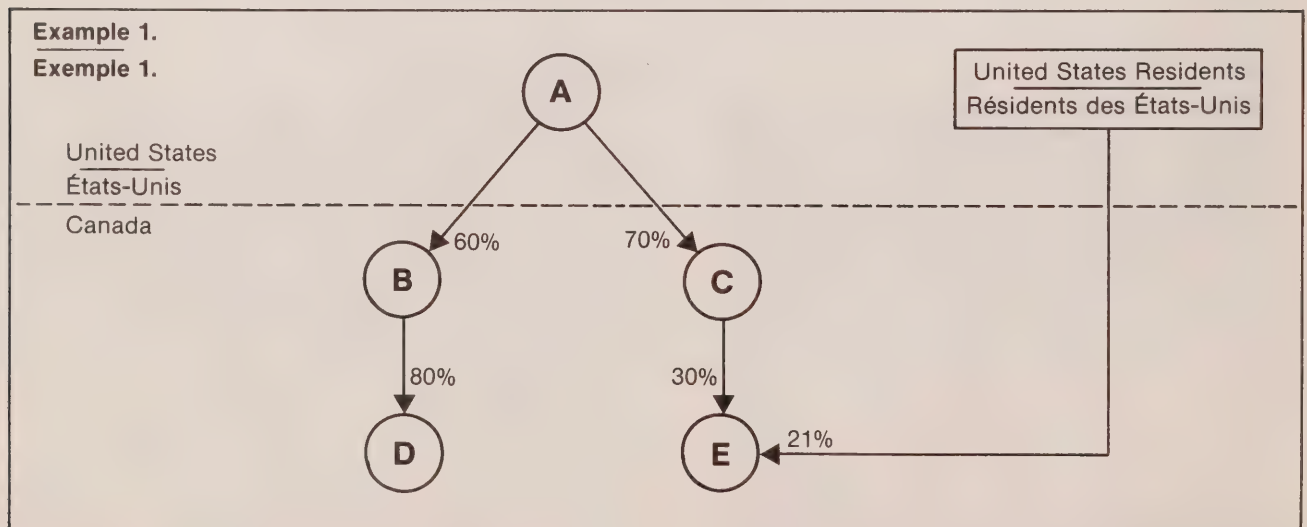

The following examples have been prepared to illustrate the assignment of a country of control for a corporation. Each lettered circle represents a corporation and an arrow indicates its ownership by another corporation or individuals (e.g., A $\xrightarrow{60\%}$ B indicates that corporation A owns 60% of corporation B's voting rights).

pays étranger le contrôle est considéré étranger non spécifié (voir exemple 5). Une corporation mère dont les droits de vote appartiennent dans une proportion égale à une corporation contrôlée au Canada et à une corporation sous contrôle étranger reçoit le code de contrôle étranger (voir exemple 3). Si deux corporations sous contrôle étranger possèdent une proportion égale de la majorité des droits de vote d'une corporation canadienne, les États-Unis ont la priorité, suivis du Royaume-Uni puis des autres pays de l'OCDE (voir exemple 4).

La stricte observation de toutes les conventions précédentes peut conduire au reclassement d'une compagnie par suite de petites transactions d'actions lorsque les actions donnant droit de vote dans une compagnie appartiennent à des non-résidents dans une proportion de près de 50%. Pour éviter cela, on reclasse les corporations seulement lorsqu'une part appréciable des droits de vote change de mains ou lorsque le contrôle réel ou éventuel de la direction de la compagnie en est effectivement modifié.

Dans la plupart des cas de contrôle étranger, la classification du pays de contrôle se fait en retraçant les liens de parenté jusqu'à la première corporation mère qui réside dans un pays étranger. Cependant, on découvre parfois que la première corporation mère étrangère est elle-même contrôlée par une autre corporation d'un autre pays. Le contrôle est alors attribué au pays de la corporation qui est propriétaire ultime.

Voici des exemples de la façon d'attribuer un pays de contrôle à une corporation. Chaque lettre encadrée représente une corporation et l'appartenance à une autre entreprise ou à des particuliers est indiquée par une flèche (par ex., A $\xrightarrow{60\%}$ B signifie que la corporation A détient 60 % des droits de vote de la corporation B).

In Example 1, all corporations are assigned a United States control code.

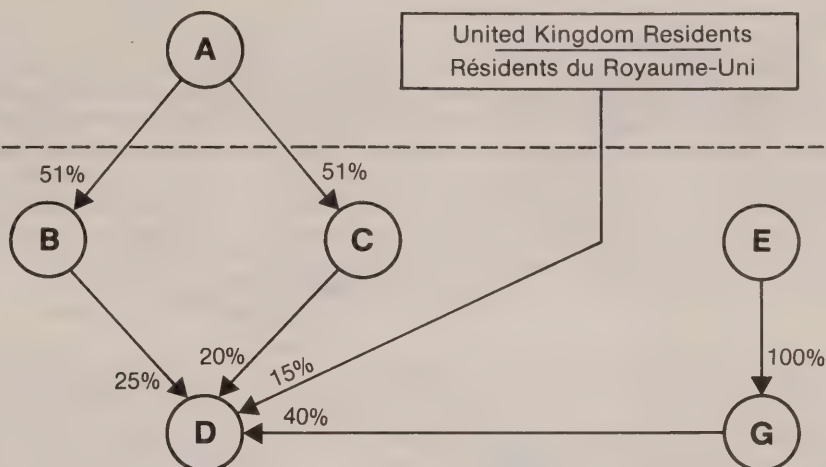

Dans l'exemple 1, toutes les corporations reçoivent le code de contrôle des États-Unis.

Example 2.

Exemple 2.

United Kingdom
Royaume-Uni

Canada

Corporations E and G are assigned Canadian control. All other corporations are assigned United Kingdom control.

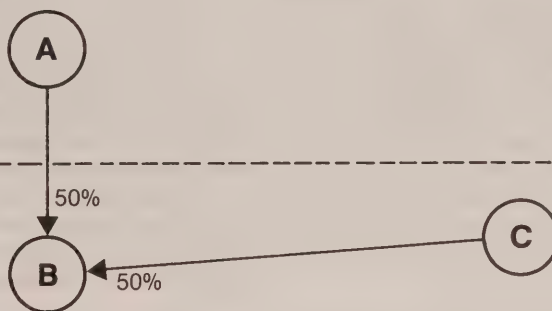

Les corporations E et G sont sous contrôle canadien. Toutes les autres sont sous le contrôle du Royaume-Uni.

Example 3.

Exemple 3.

Japan — Japon

Canada

Corporation B is assigned Japanese control.

La corporation B est sous le contrôle du Japon.

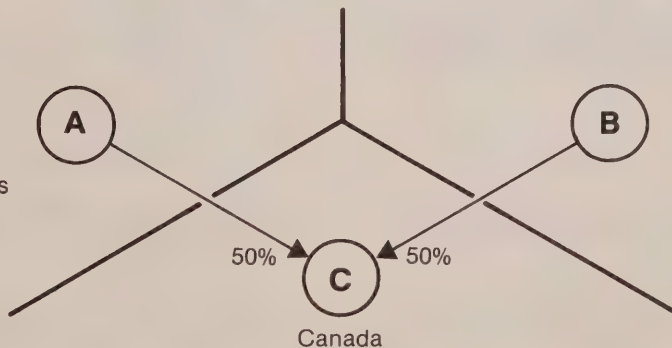

Example 4.

Exemple 4.

United States
États-Unis

Sweden — Suède

Canada

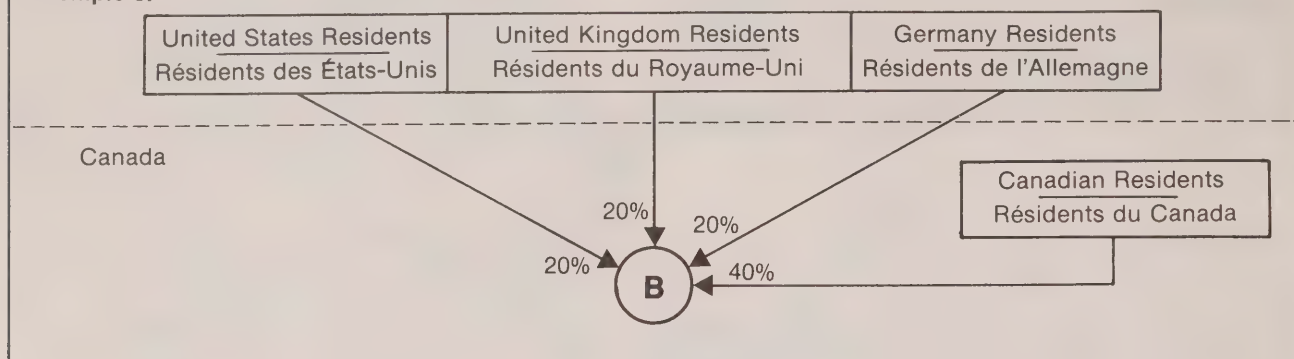

In Example 4, corporation C is considered United States controlled.

Dans l'exemple 4, on considère que la corporation C est sous le contrôle des États-Unis.

Example 5.

Exemple 5.

Corporation B is considered "foreign-controlled unspecified" as the majority of voting rights are owned outside Canada and no one country can be identified as having controlling interest.

On considère que la corporation B est sous "contrôle étranger non spécifié" puisque la majorité des droits de vote sont détenus à l'extérieur du Canada et qu'aucun pays détient des intérêts majoritaires.

Industrial Classification

The industrial classification of corporations is based on the 1960 *Standard Industrial Classification Manual*.¹

When a corporation is engaged in only one kind of industrial activity, industrial classification is straightforward. However problems can arise when a corporation is active in more than one kind of classifiable industrial activity. This usually occurs when a corporation operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added"² or its

Classification des activités économiques

La classification des corporations par activité est basée sur la *Classification type des industries de 1960*.¹

Il est simple de classer une corporation lorsque celle-ci se consacre à un genre d'activités bien précis. Toutefois, des problèmes peuvent surgir lorsqu'une corporation exerce ses activités dans plus d'un secteur. Cela se produit habituellement lorsqu'une corporation exploite plus d'un établissement. L'établissement (usine, mine, magasin ou toute unité semblable) est défini, pour la statistique, comme la plus petite unité d'exploitation distincte en mesure de déclarer tous les éléments de la statistique des activités économiques qui permettent de calculer la "valeur ajoutée recensée"² ou son équivalent. On classe les corporations

¹ *Standard Industrial Classification Manual*, Statistics Canada (Catalogue 12-501).

² "Census value added" is a concept developed from the Census of Manufacturers as a measure of output applied to an establishment or to an industry. It is obtained from the value of gross output in a period, the value of materials used, the cost of light, heat and power, the cost of goods purchased for re-sale, and some service expenses commonly incurred at the establishment level. Gross output may be measured as sales or shipments of all goods produced or purchased for re-sale or production. It includes revenues from custom work, sale of electricity and the value of fixed assets produced by own employees for own use.

¹ *Classification type des industries*, Statistique Canada (no 12-501F au catalogue).

² La "valeur ajoutée recensée" est un concept élaboré à partir du recensement des manufactures afin de mesurer la production au niveau de l'établissement. Pour l'obtenir, on déduit de la valeur de la production brute au cours d'une période donnée la valeur des matières mises en oeuvre, les frais de chauffage et d'électricité, le prix de revient des biens achetés pour la revente et les frais occasionnés par certains services que l'on trouve généralement au niveau de l'établissement. La production brute peut être évaluée d'après les ventes ou les livraisons de tous les produits fabriqués ou achetés en vue de la revente ou d'après la production. On y inclut les revenus provenant des travaux à façon, la vente d'énergie électrique et la valeur des immobilisations produites par la main-d'oeuvre des établissements pour leur propre utilisation.

Approximate equivalences in some other industries are:

In trade - "Mark up on sales" which is the difference between sales and the purchase price of goods sold in a period.

In construction - The difference between billings, i.e., the value of work done or put in place, in a period and the cost of materials and supplies used and payments made or due to sub-contractors.

In service - The difference between operating revenue received or due in a period and the cost of materials, supplies and services recorded in the census as used in the period.

Parmi les termes équivalents pour d'autres activités économiques, citons:

Dans le commerce - La marge bénéficiaire, soit la différence entre le chiffre des ventes et le prix d'achat des marchandises vendues au cours d'une période donnée.

Dans le bâtiment - La différence entre les facturations, c.-à-d. la valeur des travaux exécutés ou mis en place, au cours d'une période donnée et le coût des matériaux utilisés, ainsi que les sommes versées ou dues aux sous-traitants.

Dans les services - La différence entre les recettes d'exploitation reçues ou acquises au cours d'une période donnée et le coût des matières, fournitures et services dont l'utilisation au cours de la même période a été constatée à l'occasion du recensement.

equivalent. Corporations with several establishments are assigned to the industry that accounts for the largest share of the "census value added" or its equivalent. Inevitably, this procedure distorts the picture of the industrial activity of a corporation.

Large corporations are assigned consistently to the same industry, regardless of observed changes in their nature of business, unless such changes are of considerable importance and are more than of a transitory nature. This imposition of consistency does not in any way alleviate the distortions that will occur when a multi-activity corporation must be assigned to one industry.

The Business Finance Division has made a number of important departures from the conventions adopted in the *Standard Industrial Classification Manual* for the petroleum and natural gas industries, the non-ferrous metal mining, smelting and refining industries and the financial industries. The activities of integrated corporations in the oil and natural gas industries may embrace two or more combinations of either extraction, refining, transportation, wholesaling or retailing. All integrated firms that have activities in petroleum refining (SIC 365) are classified to that industry. All other petroleum or natural gas related firms are classified to the industry that contributes the greatest census value added. A similar departure has been taken in the case of non-ferrous metal mining, smelting and refining industries. Integrated companies are included with metal mining (SIC 053-057, 059). The Business Finance Division's coding of the financial industry provides the most detailed classification possible. A description is available by obtaining a copy of *Financial Institutions* (Catalogue 61-006), Quarterly.

A list of the industrial classification codes and their description is presented preceding the ownership links section.

Group

A group is a set of corporations such that every corporation is directly or indirectly related to every other corporation.

The following example shows two groups. In the first group, corporation A owns 40% of the voting rights of corporation B. Corporation B owns 60% of the voting rights of corporation C and 80% of the voting rights of corporation D. Corporation E owns 20% of D's voting rights. As there are no other inter-corporate ownerships involving A, B, C, D, or E with another corporation, they form a group. Similarly, F, G, and H form another group.

ayant plusieurs établissements dans l'activité économique qui est à l'origine de la majeure partie de "la valeur ajoutée recensée" ou de son équivalent. Ce procédé fausse inévitablement l'image qu'on donne de l'activité de la corporation.

On classe toujours les grandes corporations dans la même catégorie économique, sans égard aux modifications susceptibles de se produire dans la nature de l'entreprise, à moins que cette modification soit très importante ou qu'elle se révèle permanente. Cette règle d'uniformité ne corrige pas pour autant les déséquilibres qui se produisent lorsqu'il faut assigner une catégorie économique à une corporation exerçant diverses activités.

La Division des finances des entreprises s'est sensiblement écartée un certain nombre de fois des conventions établies dans la *Classification des activités économiques* en ce qui concerne le pétrole et le gaz naturel, l'extraction, la fonte et l'affinage des métaux non ferreux et les finances. Les corporations intégrées du secteur du pétrole et du gaz naturel peuvent exercer deux ou plusieurs activités dans les domaines de l'extraction, du raffinage, du transport et du commerce (gros et détail). Toutes les entreprises intégrées qui font le raffinage du pétrole (CAE 365) sont classées dans cette industrie, et toutes les autres entreprises dont l'activité se rapporte au pétrole ou au gaz naturel sont classées dans l'industrie où la valeur ajoutée recensée est la plus grande. En ce qui concerne l'extraction, la fonte et l'affinage des métaux non ferreux, la division a pris les mêmes libertés. Les compagnies intégrées ont été incluses dans le secteur des mines métalliques (CAE 053-057, 059). Le codage de la Division des finances des entreprises pour le secteur financier offre la ventilation la plus détaillée possible. Les codes utilisés sont expliqués dans la publication trimestrielle intitulée *Institutions financières* (n° 61-006 au catalogue).

Une liste des codes identifiant la classification des activités économiques et une brève description précède la section liens de parenté.

Le groupe

Un groupe est un ensemble de corporations où chacune est directement ou indirectement liée à toutes les autres.

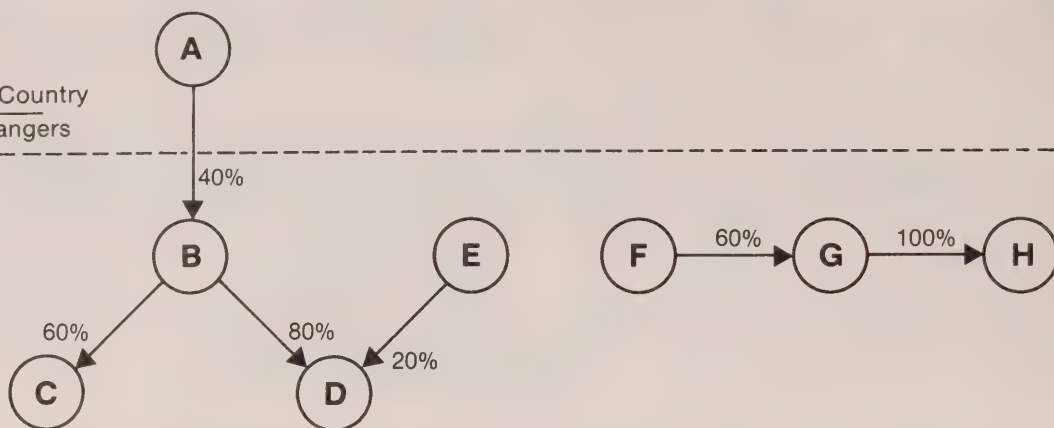

L'exemple qui suit fait voir deux groupes. Dans le premier, la corporation A détient 40 % des droits de vote de la corporation B. Celle-ci détient 60 % des droits de vote de la corporation C et 80 % de ceux de la corporation D. La corporation E possède 20 % des droits de vote de la corporation D. Comme il n'existe aucun autre lien de parenté entre A, B, C, D ou E et une autre corporation, elles forment un groupe. F, G et H constituent un autre groupe.

Control

The primary determinant of control of a corporation by another corporation or individuals, is the ownership of the majority of the corporation's voting rights. However, in some of those cases where the ownership of voting rights is insufficient to assign control, research is undertaken to determine if options, interlocking directorships or key privately held shares exist. The findings are integrated into the control assignment process where applicable.

There are numerous methods of control outside the scope of this publication. When the majority of a corporation's voting rights are widely diffused, a single relatively small block of shares may provide effective control. Furthermore, franchise and licensing agreements and marketing arrangements and sales contracts may also prove effective in controlling a corporation. In addition, a variety of these methods may be employed together to obtain effective control where there exists no majority shareholders.

Care should be taken in using the word "controlled". In many cases where control is said to exist, corporations may still function with considerable autonomy in their financial, marketing, or operational activities. Control should be used in the context of a potential that exists and is exercised within the framework of a corporate industrial society with highly varied management practices.

Given a group, if a corporation or related individuals called A, has directly or indirectly greater than 50% of the exercisable voting rights of a corporation B, then A controls B.

Le contrôle

Le principal facteur du contrôle d'une corporation par une autre corporation ou par des particuliers est la possession de la majorité des droits de vote de la corporation. Toutefois, lorsque ce critère n'est pas déterminant, on cherche à savoir s'il existe des options ou des administrateurs de liaison ou encore si des particuliers détiennent des blocs d'actions importants. Les conclusions de ces recherches servent, le cas échéant, à établir le contrôle.

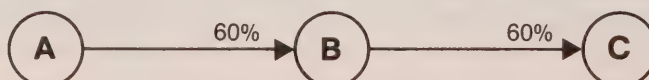

Il existe diverses méthodes de contrôle qui ne sont pas abordées dans la présente publication. Lorsque la majorité des droits de vote d'une corporation sont éparpillés, un bloc d'actions relativement petit peut conférer le contrôle effectif d'une corporation. En outre, les accords de concession ou de licence, les ententes de mises en marché et les contrats de vente peuvent aussi être déterminants du contrôle d'une corporation. Il est même possible de recourir à plusieurs de ces méthodes pour exercer un contrôle réel lorsqu'il n'existe pas d'actionnaire majoritaire.

Il faut employer le terme "contrôle" avec prudence. Souvent, même lorsqu'il y a contrôle, les corporations peuvent conserver une marge d'autonomie considérable en ce qui concerne les finances, la mise en marché ou l'exploitation. Le contrôle représente avant tout un potentiel, qui est exercé dans le cadre de structures industrielles caractérisées par une grande diversité de méthodes de gestion.

Dans un groupe donné, si une corporation (ou des personnes apparentées) que nous appellerons A détient directement ou indirectement plus de 50 % des droits de vote effectifs d'une corporation B, elle contrôle B.

Example 7.

Exemple 7.

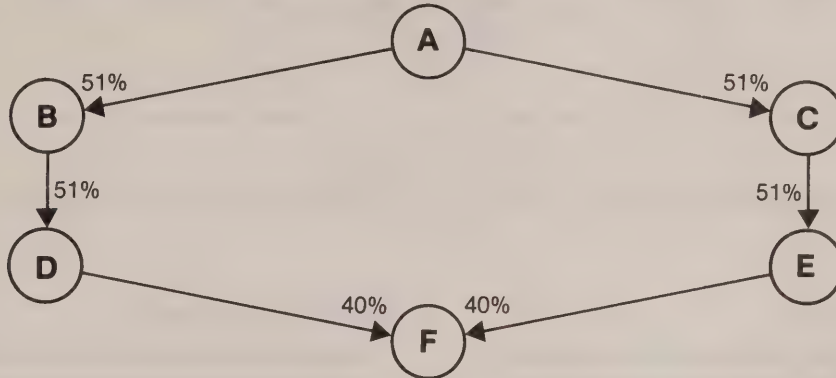

A controls B; B controls C and hence A controls C. The control of B by A is direct control. The control of C by A is indirect control.

A contrôle B, B contrôle C, A contrôle donc C. Le contrôle de B par A est un contrôle direct. Le contrôle de C par A est un contrôle indirect.

Example 8.

Exemple 8.

In this example, A controls all other corporations. From the logic of the previous example A controls B and C directly and D and E indirectly. As the sum of the voting rights of F by D and E is 80% then A controls F. This is cumulative indirect control.

A contrôle ici toutes les autres corporations. Suivant le même raisonnement, nous pouvons déduire que A contrôle directement B et C et indirectement D et E. Comme D et E possèdent au total 80 % des droits de vote de F, on peut affirmer que A contrôle F. Il s'agit de contrôle indirect cumulatif.

Enterprise

A corporation that is not controlled by another corporation and does not control another corporation is called a single corporation enterprise. Such a corporation is also called an enterprise head.

A number of corporations acting under common control defines a multiple corporation enterprise. The corporation that controls is called an enterprise head and the controlled corporations are called subsidiaries.

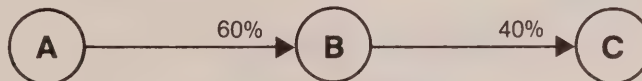

Entreprise

Une corporation qui n'est pas contrôlée par une autre et qui n'en contrôle pas d'autres est appelée entreprise à corporation unique. Cette corporation est également dénommée tête d'entreprise.

Un certain nombre de corporations dépendant d'un même contrôle forment une entreprise à corporations multiples. La corporation contrôlant cette entreprise est appelée tête d'entreprise et les corporations contrôlées sont des filiales.

Example 9.

Exemple 9.

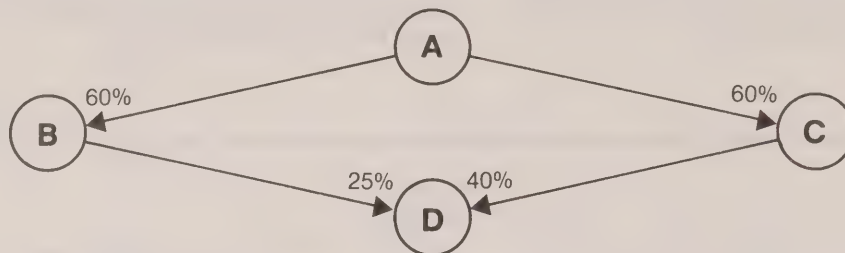

In this example A and B form a multiple corporation enterprise with enterprise head A. C is a single corporation enterprise.

Dans cet exemple, A et B forment une entreprise à corporations multiples dont A est la tête. C est une entreprise à corporation unique.

Example 10.

Exemple 10.

A is an enterprise head with subsidiaries B, C and D.

A est la tête et B, C et D sont des filiales.

Joint Equal Ownership

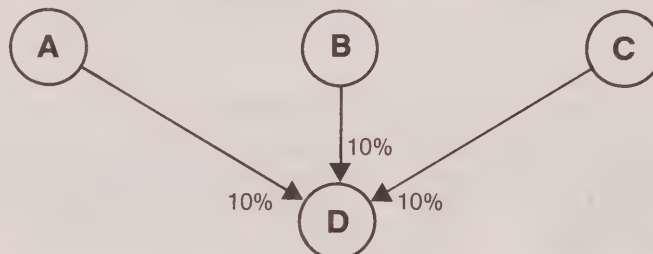

If the voting rights of an enterprise head are held directly or indirectly by two or more different enterprises and if the two highest voting rights percentages are equal then the enterprise head is called a JEO and the relationship with the holding companies is called joint equal ownership.

La propriété à part égale

Si les droits de vote d'une tête d'entreprise sont détenus directement ou indirectement par deux entreprises ou plus et que les deux pourcentages les plus élevés des droits de vote sont égaux, la tête d'entreprise est dite entreprise en propriété à part égale (EPPE-JEO dans les tableaux), et le lien de parenté avec les compagnies actionnaires est appelé propriété à part égale.

Example 11.

Exemple 11.

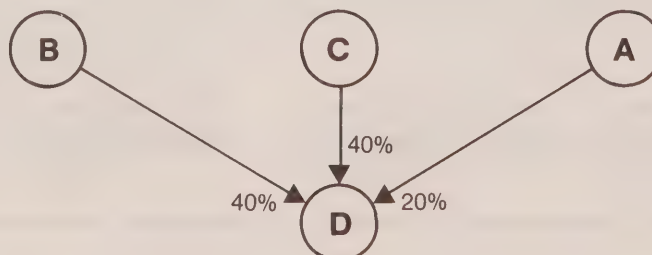

D is a JEO held by A, B and C.

D est une EPPE contrôlée par A, B et C.

Example 12.

Exemple 12.

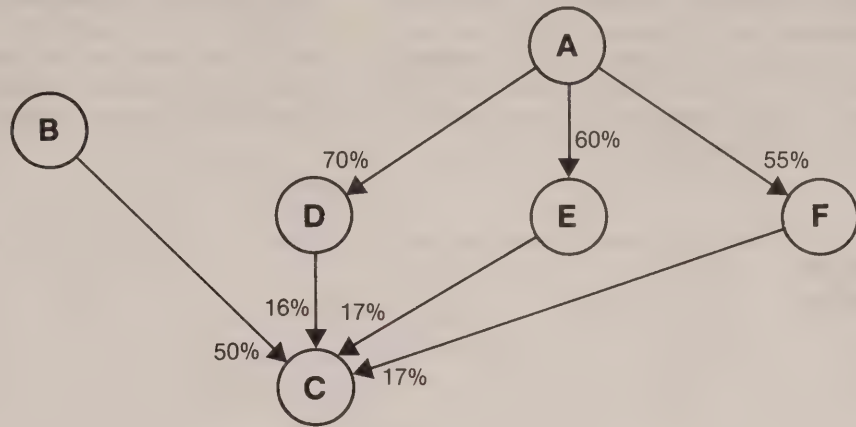

D is a JEO by corporations B and C.

D est une EPPE contrôlée par les corporations B et C.

Example 13.

Exemple 13.

B holds 50% of C directly and A holds 50% of C indirectly. Thus C is a JEO by corporations B and A.

B détient directement 50 % de C, et A détient indirectement 50 % de C. C est donc une EPPE appartenant aux corporations B et A.

Ultimate Owners and Complexes

To this point all corporations within a group have been classified as either enterprise heads or subsidiaries. The purpose of this item is to further define enterprise heads which are of unique importance and which will facilitate the classification of non-control relationships. The refinement consists of defining certain enterprise heads as "ultimate owners" and then uniquely assigning all enterprises to an ultimate owner. The rule for assignment is based upon the strongest ownership from the ultimate owner. The set consisting of an ultimate owner and its assigned enterprises defines what is called the complex. The ultimate owner within the complex is also called the complex head.

The first type of ultimate owner is that enterprise head whose voting rights are not owned by another corporation.

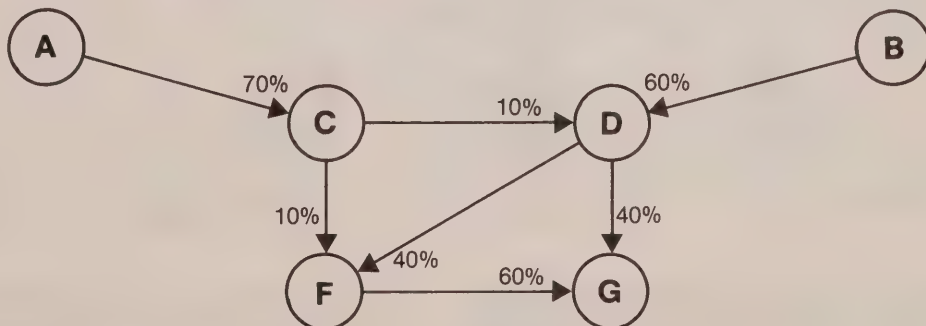

Les propriétaires ultimes et les complexes

Jusqu'ici, nous avons classé toutes les corporations d'un groupe comme têtes d'entreprises ou comme filiales. Nous allons caractériser davantage les têtes d'entreprises qui revêtent une importance particulière afin de faciliter la classification des liens de parenté sans contrôle. Il s'agit de désigner certaines têtes d'entreprise comme propriétaires ultimes, puis d'attribuer toutes les entreprises à un propriétaire ultime. L'entreprise est attribuée au propriétaire ultime qui détient la plus grande part des actions. L'ensemble formé par un propriétaire ultime et les entreprises à qui elles sont assignées forment ce que nous appelons un complexe. Le propriétaire ultime d'un complexe est également appelé tête de complexe.

Le premier type de propriétaire ultime est la tête d'entreprise dont les droits n'appartiennent à aucune autre corporation.

Example 14.

Exemple 14.

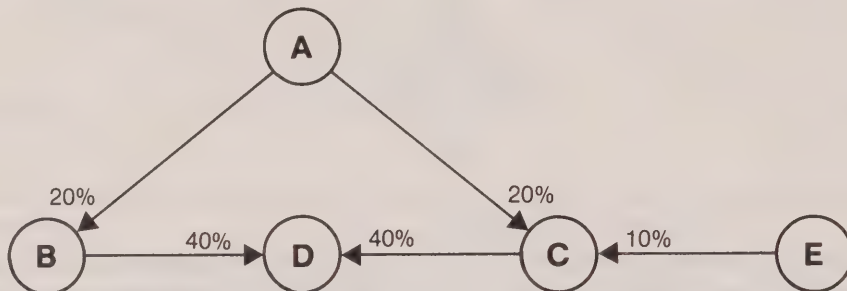

In Example 14, there are two complexes. The first complex, headed by corporation A, consists of the multicorporation enterprises A and C. The other complex, headed by the ultimate owner B, consists of two enterprises — namely corporations B and D in the ultimate owner's enterprise, and corporations F and G in the other enterprise.

Il y a deux complexes dans l'exemple 14. Le premier, dont la tête est A, est constitué de l'entreprise à corporations multiples A et C. L'autre, dont la tête est le propriétaire ultime B, est formé de deux entreprises, soit les corporations B et D de l'entreprise propriétaire ultime, et les corporations F et G de l'autre entreprise.

Example 15.

Exemple 15.

In Example 15, there are again two complexes. The four single corporation enterprises A, B, C and D are assigned to ultimate owner A. The other complex consists of the single corporation E.

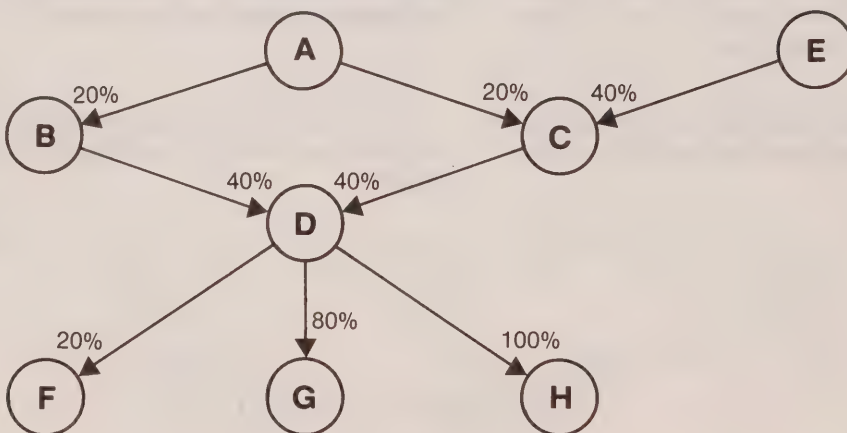

Il y a aussi deux complexes dans l'exemple 15. Les quatre corporations distinctes A, B, C et D sont attribuées au propriétaire ultime A. L'autre complexe est formé de la seule corporation E.

The assignment of enterprises to true ultimate owners will not completely assign all enterprises. Consider the following two examples.

L'attribution des entreprises à leur propriétaire ultime véritable ne sera pas exhaustive. Examinons les deux exemples suivants.

Example 16.

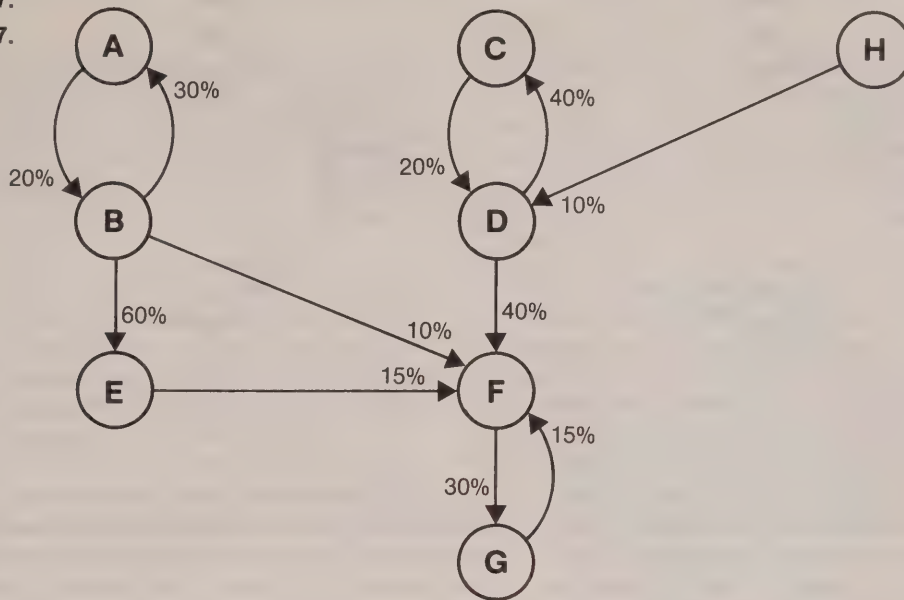

Exemple 16.

In Example 16, corporations assigned to different complex heads each hold 40% of D and thus the D enterprise cannot be assigned, and as a result, neither can F.

Dans l'exemple 16, les corporations attribuées à différentes têtes de complexe détiennent chacune 40 % de D. On ne peut donc assigner une tête de complexe à l'entreprise D et, par conséquent, à l'entreprise F.

Example 17.
Exemple 17.

There exists only one true ultimate owner, H, in Example 17, and his complex contains only himself. The seven other corporations are not assigned to a complex head due to the two loops $A \rightleftharpoons B$ and $C \rightleftharpoons D$.

These two types of problems are solved if two other ultimate owners are defined. A JEO ultimate owner is that JEO which has equal ownership by two or more complex heads such as corporation D in Example 16. A loop ultimate owner is the least owned member of a loop such as corporations B and D in Example 17.

In re-examining Example 16 it is clear that D is a JEO ultimate owner and thus enterprises D and F form a complex. In re-examining Example 17 it is clear that once B and D are identified as ultimate owners, all the remaining enterprises may be assigned. Even the corporations in the loop $F \rightleftharpoons G$ may be assigned to ultimate owner D.

Non-control Relationships

If two corporations are directly related and are members of different enterprises and both enterprises are assigned to the same complex head then such a relationship is termed a relationship between enterprises.

If two corporations are directly related and are members of different complexes then such a relationship is termed a relationship between complexes.

Dans l'exemple 17, il n'existe qu'un propriétaire ultime véritable, soit H, et son complexe ne comprend que lui. Une tête de complexe ne peut être assignée aux sept autres corporations, en raison des deux boucles $A \rightleftharpoons B$ et $C \rightleftharpoons D$.

On peut résoudre ces deux types de problèmes lorsque l'on définit deux autres genres de propriétaires ultimes. Un propriétaire ultime en propriété à part égale est l'EPPE qui est possédée également par deux têtes de complexe ou plus (la corporation D dans l'exemple 16). Quand il existe une boucle, le propriétaire ultime est la composante la moins dépendante de la boucle (la corporation B dans l'exemple 17).

Il ressort de l'exemple 16 que D est un propriétaire ultime en propriété à part égale et que, par conséquent, les entreprises D et F forment un complexe. Dans l'exemple 17, le choix des corporations B et D comme propriétaires ultimes entraîne l'attribution de toutes les autres entreprises. Même les corporations de la boucle $F \rightleftharpoons G$ peuvent être attribuées en propriété ultime à la corporation D.

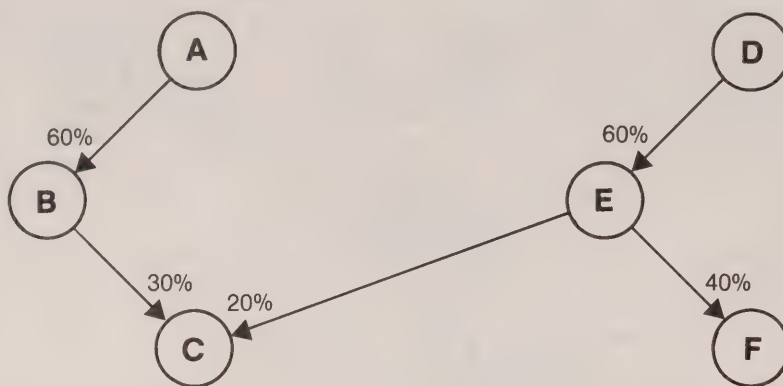

Liens de parenté sans contrôle

Si deux corporations ont des liens directs et appartiennent à différentes entreprises et que toutes deux sont attribuées à la même tête de complexe, une telle relation est appelée liens entre entreprises.

Si deux corporations ont des liens directs et appartiennent à différents complexes, une telle relation est appelée liens entre complexes.

Example 18.

Exemple 18.

As corporations B and C are both in the same complex the relationship between B and C is a relationship between enterprises (entreprises A and C). As C is assigned to complex A and E is a member of complex D, the relationship between C and E is a relationship between complexes.

Note, all relationships between corporations are now uniquely classified into three categories. The first is that of control and such relationships define the enterprise. The non-control relationships are subdivided into two categories, relationships between enterprises and relationships between complexes.

Les corporations B et C appartiennent toutes deux au même complexe, les liens entre B et C sont des liens entre entreprises (entreprises A et C). Comme C est attribuée au complexe A et que E fait partie du complexe D, les liens entre C et E sont des liens entre complexes.

Notons que tous les liens entre corporations se résument à trois types. Le premier type est le contrôle, et de tels liens déterminent l'entreprise. Les autres liens (sans contrôle) se subdivisent en deux catégories: liens entre entreprises et liens entre complexes.

HOW TO USE THE PUBLICATION

Index

The inter-corporate index is an alphabetical listing of all the corporations and related groups contained in the ownership section. It also includes an alphabetical listing of all foreign-controlled corporations (shown in boldface print), even those without inter-corporate ownership.

Sequence

In sorting names for the index most articles, conjunctions and prepositions in both English and French, and punctuation are ignored. For example, **THE DE HAVILLAND AIRCRAFT OF CANADA LIMITED** appears under **HAVILLAND**. The words **COMPAGNIE**, **CORPORATION**, **LIMITEE** and **LIMITED** are shortened and are found under **CIE**, **CORP**, **LTEE** and **LTD** respectively. Names starting with a number appear at the beginning of the index.

Cross-references

Two cross-references are shown for each corporation. One is the page number where the corporation appears in the ownership section. The second is a group-complex-enterprise (**GRP-CPX-EN**) code which may assist in locating a specific corporation on a page, when the page contains more than one enterprise.

Cross-references are not shown for those foreign-controlled corporations that do not have inter-corporate ownership; a country of control appears instead. These corporations may be foreign branches or Canadian-resident corporations that are owned and controlled directly by foreign individuals.

Corporation Status and Control

In addition to a cross-reference, the index directly provides other information. All foreign-controlled corporations are shown in boldface print. A specific country of control is identified in the ownership section, for all corporations with inter-corporate links. The index also shows the ownership status of each corporation:

- ULT** – (ULTIMATE OWNER) A corporation that is not owned by any other corporation, except when it is owned by a corporation that it itself has an interest in (Loop Ultimate Owner).
- JEO** – (JOINT EQUALLY OWNED) A corporation that is joint equally owned by other corporations.
- ENT** – (ENTERPRISE) A corporation owned by one or more corporations but not controlled by them.
- SUB** – (SUBSIDIARY) A corporation controlled by any of the above.

UTILISATION DE LA PUBLICATION

Index

L'index énumère alphabétiquement toutes les corporations et les groupes que renferme la section des liens de parenté. Les corporations sous contrôle étranger, y compris celles qui n'ont aucun lien de parenté, figurent également dans l'index, par ordre alphabétique (en caractère gras).

Ordre

Dans l'ordre des noms, nous n'avons pas tenu compte de la plupart des articles, conjonctions et prépositions, tant en français qu'en anglais, ainsi que de la ponctuation. Par exemple, **THE DE HAVILLAND AIRCRAFT OF CANADA LIMITED** figure sous **HAVILLAND**. Les mots **COMPAGNIE**, **CORPORATION**, **LIMITÉE** et **LIMITED** sont abrégés respectivement par **CIE**, **CORP**, **LTÉE** et **LTD**. Les noms commençant par un chiffre viennent au début de l'index.

Renvois

Il y a deux renvois pour chaque corporation. L'un donne le numéro de la page où la corporation figure dans la section des liens de parenté, l'autre est un code de groupe-complexe-entreprise (**GRP-CPX-EN**) qui permet de localiser une corporation sur une page qui contient plus d'une entreprise.

Par ailleurs, les corporations sous contrôle étranger qui n'ont aucun lien de parenté ne comportent aucun renvoi; au lieu, le pays de contrôle y apparaît. Il peut s'agir de succursales étrangères ou de corporations résidant au Canada que des étrangers possèdent et contrôlent directement.

Situation des corporations et contrôle

En plus des renvois, l'index fournit directement divers autres renseignements. Toutes les corporations sous contrôle étranger sont présentées en caractères gras. Le pays de contrôle de toutes corporations ayant des liens est précisé dans la section des liens de parenté. L'index indique ainsi la situation de parenté de chaque corporation:

- ULT** – (PROPRIÉTAIRE ULTIME) Corporation qui n'est possédée par aucune autre corporation, sauf lorsqu'elle est possédée par une corporation dans laquelle elle a elle-même des intérêts (boucles).
- JEO** – (PROPRIÉTÉ À PART ÉGALE) Corporation possédée en parts égales par d'autres corporations.
- ENT** – (ENTREPRISE) Corporation possédée par une ou plusieurs corporations, mais non contrôlée par celles-ci.
- SUB** – (FILIALE) Corporation contrôlée par l'une ou l'autre des corporations susmentionnées.

Ownership

Presentation

The ownership section shows the percentage of a corporation's voting rights held or owned by another corporation or related group. Each line shows the held (owned) corporation on the left-hand side of the page and the holding (owning) corporation on the right. The ownership proportion appears between the names under the heading **DIRECT HOLDING %**. In addition, the SIC and residence of each held corporation are shown under appropriate headings on the left-hand side of each page.

Enterprise Relationships

Ownership relationships are listed in a specific order according to the group, complex and enterprise codes of the owned and owning corporations. When two or more directly related corporations are identified as being under common control their relationships appear under a boldface enterprise title line. This title line provides information concerning both the controlling interest and all corporations in the enterprise. First, the group-complex-enterprise (**GRP-CPX-EN**) code which applies to all corporations in the enterprise appears. Next, the country of control (**CNTRL**) of the enterprise is shown. This is followed by the SIC and residence code of the enterprise head (parent corporation). Next, the name of the enterprise head is shown.

The relationships among the corporations in the enterprise are shown in a tiered order commencing with the controlling interest on the right-hand side with an alphabetical arrangement of its direct holdings on the left-hand side. As required, if any of these direct holdings themselves are holders of other corporations in the enterprise, they would next appear on the right-hand side with their holdings alphabetically arranged on the left-hand side. This process continues until the ownership of all corporations within the enterprise is shown.

Relationships Between Enterprises

Note, sometimes within the same complex corporations within an enterprise have investments in another enterprise. In addition, in complexes containing more than one enterprise, some enterprise title lines have no ownership shown beneath them because the corporation owns but does not control any other corporation. In these cases the ownership of such directly related corporations appears under the heading Relationships Between Enterprises. This heading appears once at the end of each ownership complex. **Note, when an ownership complex contains two or more enterprises there must be such relationships.** The corporations involved have the same group and complex codes but a different enterprise code. These relationships are particularly important.

Propriété

Présentation

La section des liens de parenté donne la proportion des droits de vote d'une corporation détenus par une autre corporation ou un groupe. Sur chaque ligne, on mentionne à gauche la corporation dont les droits de vote sont détenus par d'autres (corporation détenue) et la corporation qui les détient à droite (corporation actionnaire). Sous la rubrique **PARTICIPATION DIRECTE**, entre les noms des corporations, figure le pourcentage des droits de vote détenus. En outre, les codes de CAÉ et de résidence de chaque corporation détenue apparaissent sous la rubrique appropriée, du côté gauche de chaque page.

Liens dans l'entreprise

Les liens de parenté sont indiqués dans un ordre déterminé, selon les codes de groupe, de complexe et d'entreprise des corporations. Lorsque deux ou plusieurs corporations directement liées sont sous un même contrôle, leurs liens figurent sous un nom d'entreprise en caractères gras (vedette-entreprise). Cette vedette-entreprise fournit des renseignements sur la participation de contrôle et sur toutes les corporations qui font partie de l'entreprise. Tout d'abord, il y a le code de groupe-complexe-entreprise (**GRP-CPX-EN**) qui s'applique à toutes les corporations de l'entreprise. Ensuite figurent le pays de contrôle (**CNTRL**), le code de la CAÉ et le code de résidence de la tête d'entreprise (corporation mère). Enfin, le nom de la tête d'entreprise est indiqué.

Les liens entre corporations de l'entreprise sont indiqués par échelons, en commençant par la corporation mère du côté droit; les corporations dans lesquelles celle-ci a une participation directe figurent du côté gauche, par ordre alphabétique. Le cas échéant, si l'une de ces corporations possède elle-même d'autres corporations de l'entreprise, elle apparaîtra du côté droit; les corporations qu'elle possède figureront du côté gauche, par ordre alphabétique. On procède ainsi pour toutes les corporations de l'entreprise.

Liens entre les entreprises

Il arrive parfois qu'au sein d'un même complexe, des corporations appartenant à une entreprise aient des participations dans une autre entreprise. En outre, dans les complexes qui comptent plus d'une entreprise, aucun lien n'est indiqué sous les rubriques de certaines entreprises parce que la corporation possède une autre corporation, mais ne la contrôle pas. Dans ces cas, les liens directs entre corporations figurent sous la rubrique Liens entre les entreprises. Cette rubrique apparaît à la fin de chaque complexe. **Notons que si un complexe renferme deux ou plusieurs entreprises, il existe nécessairement des liens entre elles.** Les corporations en cause ont le même code de complexe et de groupe, mais des codes d'entreprise différents. Ces liens ont une importance particulière. Si la proportion des droits de vote détenus est appréciable, il peut s'agir d'un contrôle potentiel, effectif

If the percentage of ownership is substantial then the relationship may be one of potential, effective or minority control. Such relationships are sorted to start with the ultimate owner (EN-AA) or one of its controlled corporations on the right-hand side with its holdings sorted alphabetically on the left-hand side.

Relationships Between Complexes

Note, two directly related corporations may not only be in different enterprises, but each enterprise may be part of a different complex. In addition some title lines for an ultimate owner show no ownership underneath them and may have only one enterprise.

In these cases relationships will be found under the heading Relationships Between Complexes. This heading appears once at the end of each group. **If a group contains more than one complex (ultimate owner or JEO) it must have such relationships.** Such directly related corporations have the same group number but a different complex code. Relationships such as joint ventures and minority investments appear in this section. Such relationships are sorted by the complex number of the held corporation (left-hand side) and show all of its holders (right-hand side) in ascending complex number order.

Notes Column

If an asterisk appears in the Notes Column opposite an enterprise title line it indicates that one or more corporations are included in the enterprise due to inter-locking directorates or options.

As a corporation in an enterprise may have a relationship with another enterprise in its complex or with a corporation in another complex, notes appear on the right-hand side to identify which corporations are so involved. Generally such a note appears opposite the relationship lines that make up an enterprise as follows:

- E** the holding corporation (right-hand side) has a relationship between enterprises
- E**, the held corporation (left-hand side) has a relationship between enterprises
- C** the holding corporation (right-hand side) has a relationship between complexes
- C**, the held corporation (left-hand side) has a relationship between complexes.

Note, some corporations may have both a relationship between enterprises and a relationship between complexes and a combination of the preceding codes may appear.

Note, if a **C** appears in the Notes Column opposite an enterprise title line it indicates that the enter-

ou minoritaire. Dans ce cas, on indique tout d'abord le propriétaire ultime (EN-AA) ou l'une des corporations qu'il contrôle du côté droit de la page et on énumère alphabétiquement du côté gauche les corporations auxquelles il participe.

Liens entre les complexes

Deux corporations directement liées peuvent non seulement appartenir à des entreprises différentes, mais chacune de ces entreprises peut faire partie d'un complexe différent. En outre, certaines "vedettes-propriétaire ultime" ne sont suivies d'aucune mention de lien de parenté et peuvent comporter une seule entreprise.

Dans ces cas, on trouvera les liens sous la rubrique Liens entre les complexes. Cette rubrique apparaît une fois à la fin de chaque groupe. **Si un groupe compte plus d'un complexe (propriétaire ultime ou JEO), ces liens existent nécessairement.** Les liens directs tels que les entreprises en participation et les participations minoritaires figurent dans cette catégorie. Ces liens sont indiqués selon le numéro de complexe de la corporation détenue (à gauche) et les actionnaires sont énumérés (à droite) par ordre ascendant de numéro de complexe.

Colonne des notes

Un astérisque dans la colonne des notes vis-à-vis de la vedette-entreprise indique que une ou plusieurs corporations font partie de l'entreprise en raison de la présence d'administrateurs de liaison ou d'options.

Étant donné qu'une corporation dans une entreprise peut avoir des liens avec une autre entreprise du même complexe ou avec une corporation d'un autre complexe, on désigne par une note du côté droit de la page celles qui ont de tels liens. D'ordinaire, cette note apparaît de la façon suivante sur la ligne des liens qui constituent une entreprise:

- E** la corporation qui détient l'autre (à droite) comporte un lien entre entreprises
- E**, la corporation détenue (à gauche) comporte un lien entre entreprises
- C** la corporation qui détient l'autre (à droite) comporte un lien entre complexes
- C**, la corporation détenue (à gauche) comporte un lien entre complexes.

Certaines corporations peuvent comporter à la fois un lien entre entreprises et un lien entre complexes; une combinaison des codes précédents est alors possible.

Un **C** dans la colonne des notes vis-à-vis de la vedette-entreprise signifie que l'entreprise mère comporte un lien entre

prise parent has a relationship between complexes. This only happens if the corporation has no subsidiary and hence no enterprise relationship lines.

For the Relationships Between Enterprises section, the Notes Column provides the enterprise codes for the held and holding corporations. Similarly, for the Relationships Between Complexes section, the Notes Column provides the complex numbers for the held and holding corporation.

complexes. Cela se produit seulement si la corporation n'a aucune filiale et, par conséquent, aucune ligne de liens entre entreprises.

Pour la section des Liens entre entreprises, la colonne des notes fournit les codes d'entreprise de la corporation détenue et de celle qui est actionnaire. De même, pour la section des Liens entre complexes, la colonne des notes fournit les numéros de complexe de ces mêmes corporations.

Index

Index

LIST OF MNEMONICS

Index

"STAT" Column

An enterprise head that is designated as the head of a complex. This may be either a true ultimate owner or loop ultimate owner.

ULT

An enterprise head that is joint equally owned and designated as the head of a complex.

JEO

An enterprise head that is not a ULT or JEO. This may be the parent of a multi-corporate enterprise or a single corporate enterprise.

ENT

A corporation controlled by either a ULT, JEO or ENT.

SUB

"GRP-CPX-EN" Column

Group identifier (three alphabetical characters).

GRP

Complex identifier (four numerical characters).

CPX

Enterprise identifier (two alphabetical characters).

EN

RÉPERTOIRE NMÉNONIQUE

Index

Colonne "STAT"

Tête d'entreprise désignée comme tête de complexe. Il peut s'agir soit d'un propriétaire ultime véritable, soit du propriétaire ultime de corporations ayant des participations réciproques (boucles).

ULT

Tête d'entreprise en propriété à part égale et désignée comme tête d'un complexe.

JEO

Tête d'entreprise autre qu'une ULT ou une JEO. Il peut s'agir de la corporation-mère d'une entreprise à corporations multiples ou d'une entreprise à corporation unique.

ENT

Corporation contrôlée par une ULT, une JEO ou une ENT.

SUB

Colonne "GRP-CPX-EN"

Identificateur de groupe (trois caractères alphabétiques).

GRP

Identificateur de complexe (quatre caractères numériques).

CPX

Identificateur d'entreprise (deux caractères alphabétiques).
